

HYDRO FLOSS

The New Generation of Oral Irrigators

The **HYDRO FLOSS**® oral irrigator is the highest quality, most effective home treatment device of its kind. It complements and completes anyone's home dental care. Optimizing by flushing disrupted plaque that brushing and flossing leave behind. Completing your care by providing a cleansing for sub-gingival and those "hard-to-reach" areas.

With recent reports linking oral health to numerous life-threatening diseases, which include heart and lung disease stroke and diabetes; it has become vital to give more attention to one's home dental care. Along with brushing, flossing, and regular visits to your dentist, the **HYDRO FLOSS**® oral irrigator will assist you in your oral health. Whether you have inflamed and bleeding gums, periodontal pockets, crowns & bridge work, implant, veneers, or orthodontic appliances, the **HYDRO FLOSS**® oral irrigator will be an added plus to your home dental care.

FEATURES OF THE HYDRO FLOSS® ORAL IRRIGATOR

Twice as effective as other oral irrigators through the innovation of HydroMagnetics. The difference is, the **HYDRO FLOSS**® has the ability to inhibit the bacteria from adhering to the surface of the teeth. Clinical studies show that the **HYDRO FLOSS**® oral irrigator is 44% more effective than non-magnetic oral irrigators, (Journal of Clinical Periodontology, Vol. 20, No. 5, May 1993, pages 314-317), and up to 64% more effective than non-magnetic oral irrigators, (Journal of Clinical Periodontology, Vol 25, No. 4, April 1998, pages 316-321).

- Pulsating stream, (1200) pulses per minute
